

**EP.No. 21 /2005-06 - Progeny trial cum SSO of *Terminalia chebula*.**

1	IUCN Conservation Status	:	Least Concern	
2	Range / Location	:	Chengam (R) Range	Melchengam (R) Centre
3	Objectives	:	To raise SSO of <i>T. chebula</i> for collecting quality seeds.	
4	Area	:	2 ha.	
5	Planted / Survival	:	800 / 625.	
6	Period of experiment	:	2005-permanent.	
7	Season- month	:	Flowering-May-June. Fruiting-November-February.	
8	Details of fruit yield	:	A total of 18 kg (2024–25) of seeds were collected and sent to the Trichy Seed Centre.	
9	Current status	:	The average height is 5.43 m and the average girth as 36.50 cm. The trees are performing well with a survival rate of 78 %.	

### CPT-wise growth rate - *Terminalia chebula*

S. No.	EP. No.	Name of the Experiment	Details of CPT's			No. of trees	Survival	Av. ht. (m)	Increment height (m)	Av. Girth (cm)	Av. Dia (cm)	Increment dia (cm)	Tallest tree (m)	Increment height (m)	Max girth (cm)	Max dia (cm)	Increment dia (cm)
